# Summary Information for Simplified Chinese Fonts

Printers should have a superset table containing the information in Figure 1-3a and Figure 1-3b so that they can recognize subsets of the Simplified Chinese font character sets, which are identified by GCSGID. If a job requests a subset of an available font character set, the printer can substitute the superset.

### Chapter 3. Simplified Chinese Characters

This chapter shows all the characters in the IBM Simplified Chinese fonts.

Chapter 3.1 illustrates the IBM Simplified Chinese Graphic Character Set (revised in November 1993), which includes all characters defined by PRC National Standard, Code of Chinese Graphic Character Set for Information Interchange, Primary Set, GB 2312-80. The characters are printed in the Hei font.

Chapter 3.2 illustrates the IBM Simplified Chinese Graphic Character Set, GBK Code (revised in February 1997), which includes all characters defined by GBK, Chinese Internal Code Specification. The characters are printed in the Song font.

The number under each character is the Adobe character identifier (CID). To find the corresponding IBM graphic character global identifier (GCGID), see the Simplified Chinese mapping table in the online information on the *IBM AFP Font Collection: Outline Fonts and Programs for OS/2, LCD4-0464* (CD-ROM). The CID is in the first column and the GCGID is in the third column.

**Attention:**

- In this chapter, you will see a number of CIDs without characters assigned to them. The space for a characters image above CID is blank. This is correct.

## Chapter 4. Simplified Chinese Code Pages

This chapter illustrates the following Simplified Chinese code pages:

- T1H00836
- T1H01115
- T1HK1114
- T1H01151
- T10837ss
- T10837ss (characters for vertical writing)
- T1K837ss
- T1K837ss (characters for vertical writing)

**Note:** ss is the section number. It is blank when T10837 or T1K837 is used with an outline font.

The characters are printed in the Song font. The alphanumeric identifier under each character is the IBM graphic character global identifier (GCGID). To find the corresponding Adobe character identifier (CID), see the Simplified Chinese mapping table in the online information on the *IBM AFP Font Collection: Outline Fonts and Programs for OS/2, LCD4-0464* (CD-ROM). The GCGID is in the third column and the CID is in the first column.

**Attention:** In the Simplified Chinese mapping table, you will find that some CIDs have no corresponding GCGID. This is correct.
